

Juan Carlos Zepeda Arzate

Senior Front-End Engineer

React | Next.js | TypeScript | Angular | JavaScript | AI-Assisted Development

☎ +52 722 791 4217 ✉ ingenierozepeda@gmail.com 📍 México - Toluca

Professional Summary

Senior Front-End Engineer with **8+ years of experience** designing, developing, and modernizing enterprise web applications using **React, Next.js, TypeScript, and Angular**. Specialized in **AI-Assisted Development** to accelerate software delivery, improve code quality, and increase team productivity.

Extensive experience building modern user interfaces, scalable Front-End architectures, and **reusable component libraries** with a strong focus on performance, accessibility, maintainability, and user experience.

Led technical initiatives by defining development standards, participating in code reviews, and collaborating with cross-functional teams including **UX/UI, Backend, QA, DevOps, and Product Owners in Agile (Scrum)** environments to deliver business-driven solutions.

Strong expertise in the **React ecosystem**, including **Redux Toolkit, Context API, React Hook Form, Storybook, REST APIs, GraphQL, Shopify Storefront API, Headless CMS, component-based architecture, and Next.js (SSR, SSG, and ISR)**, applying best practices for **Core Web Vitals**, performance optimization, and **WCAG** accessibility compliance.

Implemented **CI/CD pipelines** using **Azure DevOps** and **GitHub Actions**, deployed applications on **Vercel and AWS**, integrated **Headless CMS and Shopify Storefront API** solutions, and contributed to **Microfrontends, Module Federation, and Design System** initiatives for scalable enterprise applications.

Daily user of **AI-Assisted Development** tools, including **GitHub Copilot, Claude Code, and OpenCode**, to accelerate development, improve code quality, optimize automated testing, generate technical documentation, and streamline repetitive development tasks.

Professional Experience

Senior Front-End Engineer

Feb 2022 - Apr 2026

Afore Principal

- Designed, developed, and modernized enterprise web applications for the financial sector using **React, Next.js, TypeScript, and Angular**, with a strong focus on scalability, performance, and user experience.
- Defined and implemented scalable **Front-End architectures** based on reusable components, establishing development standards and improving application maintainability.
- Developed **key features for an e-commerce platform** focused on the sale and enrollment of financial products, implementing reusable product catalogs, quotation workflows, dynamic forms, **REST API integrations, and OpenAI-powered services** to deliver personalized recommendations, improve digital conversion, and enhance the overall customer experience.
- Developed responsive product **catalog interfaces with advanced filtering, search, sorting**, and product comparison features to improve product discovery, customer engagement, and the overall e-commerce experience for financial products.

- Built a headless e-commerce storefront with **React and Next.js**, integrating **Shopify Storefront API and GraphQL** to consume products and collections, implementing reusable components, responsive UI, and modern frontend architecture.
- Optimized digital e-commerce experiences using **Next.js SSR, lazy loading**, code splitting, responsive design, and Core Web Vitals best practices to **improve performance, SEO**, and the overall customer experience.
- Developed reusable React components and dynamic product cards to showcase investment funds and financial products within a digital e-commerce platform. Built a **custom shopping cart experience** that enabled users to manage multiple savings goals and contribution plans within a single session.
- Developed secure payment selection interfaces supporting Debit Card, Direct Debit, and **SPEI transfers**, implementing **client-side validation**, secure data handling, and PCI DSS best practices to deliver a seamless and **secure payment experience**.
- Integrated third-party identity verification services via REST APIs, **implementing Skeleton UI loading states, asynchronous workflows**, robust error handling, and user-friendly validation flows to ensure a secure and frictionless customer onboarding experience within a digital financial e-commerce platform.
- Built and documented reusable component libraries using **Storybook**, strengthening the organization's **Design System** and improving collaboration across **Front-End, UX/UI, and QA** teams.
- Implemented state management solutions using **Redux Toolkit and Context API**, and developed dynamic, validated forms with **React Hook Form**, improving application performance and user experience.
- Implemented **Next.js rendering strategies (SSR, SSG, and ISR)** to optimize **Core Web Vitals**, SEO, page load performance, and overall application responsiveness.
- Integrated **Drupal Headless CMS** through **JSON:API**, leveraging **Dexie** and **IndexedDB** to manage decoupled content efficiently within Front-End applications.
- Contributed to **Microfrontend** initiatives using **Module Federation**, helping build modular, reusable, and scalable enterprise applications.
- Developed and maintained **unit, integration, and end-to-end tests** using **Jest, React Testing Library, and Cypress**, improving application stability and software quality.
- Collaborated on the implementation of **CI/CD pipelines** using **Azure DevOps, GitHub Actions, and Docker**, automating build and deployment processes to accelerate software delivery.
- Worked closely with **UX/UI, Backend, QA, DevOps, and Product Owners**, participating in technical solution design, effort estimation, **code reviews**, and continuous improvement initiatives within **Agile (Scrum)** teams.
- Contributed to the development of an **AI-powered financial simulation widget** using **OpenAI** technologies to deliver personalized recommendations and enhance the digital customer experience.
- Leveraged **AI-Assisted Development** tools, including **GitHub Copilot, Claude Code, and OpenCode**, to accelerate development, improve code quality, optimize automated testing, and generate technical documentation.
- Contributed to the modernization of enterprise applications using **Angular, TypeScript, RxJS, and Reactive Forms**, migrating legacy applications built with **jQuery, AJAX, HTML, CSS, and Bootstrap** to modern Front-End architectures while integrating **REST APIs and GraphQL** services.
- Implemented client-side persistence strategies using **Cookies, Session Storage, Local Storage, and IndexedDB** to manage authentication, user preferences, and application data efficiently.
- Led the development of critical **Front-End features** from requirements analysis through production deployment, actively participating in **code reviews**, mentoring junior developers, and implementing **WCAG 2.1**, semantic HTML, and **ARIA** accessibility best practices.
- Developed integrations using **Node.js, Express.js, and Next.js API Routes**, while contributing to the implementation of **Backend for Frontend (BFF)** services to centralize business logic and optimize communication between **React/Next.js** applications and enterprise **REST APIs**.
- Managed application deployments using **Vercel, Azure DevOps**, and Azure services, supporting CI/CD pipelines, release validation, environment configuration, and production deployments for enterprise React and Next.js applications.
- Developed and maintained scalable **styling architectures using Sass (SCSS) and Vanilla Extract**, implementing reusable styles, design tokens, theming, and consistent UI patterns across React components within the financial e-commerce platform.
- **Led frontend technical initiatives and mentored developers**, driving architectural decisions, code reviews, engineering standards, and best practices across React, Next.js, TypeScript, and Angular applications.

- Collaborated with **UX/UI teams** to interpret **wireframes** and **Figma designs**, translating them into responsive, reusable React/Next.js components while ensuring design system consistency and pixel-perfect implementation.

Senior Front-End Developer

Jul 2018 - Jan 2022

AXA Assistance

- Modernized enterprise applications for the **insurance and healthcare** industries by migrating legacy platforms built with **ASP.NET MVC, HTML5, CSS3, JavaScript, jQuery, and Bootstrap** to modern **React, Next.js, TypeScript, and JavaScript (ES6+)** Front-End architectures.
- Transformed monolithic user interfaces into **single-page, component-based applications**, implementing reusable components to improve scalability, maintainability, and long-term application evolution.
- Developed **Pixel-Perfect**, responsive user interfaces from **Figma** designs using **React, Next.js, TypeScript, Material UI, Sass (SCSS), and Bootstrap**, ensuring a consistent user experience across browsers and devices.
- Developed dynamic forms and complex validation workflows using **React Hook Form**, improving data quality and reducing errors in business-critical processes.
- Integrated **REST APIs** using **Axios** and the **Fetch API**, implementing dynamic routing, protected routes, and **Lazy Loading** with **React Router** to improve application performance and user experience.
- Optimized application performance through **Code Splitting, Lazy Loading**, and component refactoring, reducing page load times and improving code maintainability.
- Developed and maintained **unit and integration tests** using **React Testing Library** and **Cypress**, improving application stability, reliability, and software quality.
- Collaborated with **UX/UI, Backend, and QA** teams to deliver accessible, responsive user interfaces compliant with **WCAG 2.1**, while participating in technical reviews to ensure product quality.
- Contributed to the development and modernization of enterprise applications using **Angular, TypeScript, RxJS, NgRx, Angular Router, Angular Services, Reactive Forms, and Tailwind CSS**, implementing reusable components and integrating **REST APIs**.
- Participated in technology modernization initiatives by replacing legacy applications built with **jQuery** and **ASP.NET MVC** with modern solutions based on **React, Next.js, and TypeScript**, reducing technical debt and improving long-term maintainability.
- Collaborated on the configuration and optimization of **build processes** and **CI/CD workflows** using **Git, Webpack, Azure DevOps, and GitHub Actions**, improving team collaboration and streamlining application deployment.
- Supported Front-End application deployments across **Azure and AWS environments**, collaborating on build automation, release management, environment configuration, and **CI/CD processes** using **Azure DevOps and GitHub Actions**.
- Implemented lightweight global state management using **Zustand** for shared application state, improving performance, reducing unnecessary re-renders, and simplifying data flow across React applications.

Fron End

Sep

Jul 2016 - Jun 2018

- Developed and maintained web applications and internal systems using **HTML5, CSS3, Sass (SCSS), JavaScript, jQuery, AJAX, PHP, MySQL, and Firebase** for educational and administrative environments.
- Built responsive web interfaces by applying **Responsive Web Design** principles, cross-browser compatibility, and reusable UI components to enhance the overall user experience.

- Developed semantic, accessible user interfaces using **HTML5**, **CSS3**, **Bootstrap**, and **JavaScript**, improving application usability, maintainability, and accessibility.
- Developed dynamic forms with both client-side and server-side validation, improving data quality and streamlining administrative processes.
- Implemented asynchronous interactions using **AJAX** and **jQuery**, reducing full-page reloads and improving application responsiveness and user experience.
- Collaborated on the integration of **REST APIs** and Back-End services, contributing to authentication workflows, session management, and data consumption.
- Implemented client-side persistence strategies using **Cookies**, session management, and caching mechanisms to improve authentication, application performance, and user experience.
- Worked with **Jira** and **Git** to support Agile development, task tracking, issue resolution, version control, and production support activities.
- Participated in functional testing, debugging, and corrective and preventive maintenance activities, strengthening my understanding of the **Software Development Life Cycle (SDLC)**.
- Contributed to the refactoring and continuous improvement of Front-End modules, promoting cleaner, reusable, and more maintainable code.

Skills

Frontend

React.js, Next.js (SSR, SSG, ISR), TypeScript, JavaScript (ES6+), Angular, RxJS, React Router, Redux Toolkit, Context API, React Hook Form, HTML5, CSS3, Sass (SCSS), Vanilla Extract, Tailwind CSS, Material UI (MUI), Bootstrap, Storybook, i18next, Responsive Web Design, WCAG 2.1, ARIA, Core Web Vitals, SEO, SPAs, Jest, React Testing Library, Cypress, Lazy Loading, Code Splitting, Module Federation, Drupal Headless CMS, Webpack, Vite, Fetch API, Axios, jQuery

Backend

Node.js, Express.js, REST APIs, GraphQL, Shopify Storefront API, OpenAPI, JSON:API, API Consumption, Third-Party Integrations, JWT Authentication, OAuth 2.0, .NET, C#

Cloud & DevOps

Azure DevOps, Azure Cloud, AWS (S3), Docker, CI/CD Pipelines, GitHub Actions, Git + Version Control, Vercel

Databases

PostgreSQL, SQL Server, MongoDB, MySQL, Firebase

AI & Automation

AI-Assisted Development (GitHub Copilot, Claude Code, OpenCode), OpenAI Integrations + Agents

Architecture & Methodologies

Front-End Architecture, Design Systems, Scalable Front-End Applications, Backend for Frontend (BFF), Clean Architecture, SOLID Principles, Modular Architecture, State Management, Performance Optimization, Lazy Loading, Technical Leadership, Code Reviews, Technical Documentation, Agile/Scrum

Tools

Visual Studio Code, Git, GitHub, Azure DevOps, Jira, Figma, Postman, Swagger/OpenAPI, Storybook, Chrome DevTools, Docker Desktop, GitHub Copilot, Claude Code, ChatGPT, PowerShell, Chrome Lighthouse, NPM

Languages

Spanish — Native

English — Professional proficiency; comfortable communicating in English in professional and technical contexts, including meetings, collaboration, and technical discussions.

Education

Bachelor of Computer Engineering

Centro Universitario de Ixtlahuaca, State of Mexico, Mexico

Professional License **09635092**

Certifications

- **React Advanced** - LinkedIn Learning (2025)
- **Next.js** – Udemy (2025)
- **Angular** - Edutin Academy (2024)
- Microsoft Azure Fundamentals (AZ-900)
- Scrum Fundamentals

Professional Highlights

- **Front-End Architecture & Technical Leadership** — Designed and implemented scalable Front-End architectures using **React, Next.js, TypeScript, and Angular**, establishing development standards, promoting reusable components, conducting code reviews, and providing technical guidance across cross-functional teams.
- **AI-Assisted Development** — Leveraged **GitHub Copilot, Claude Code, and OpenCode** to accelerate software development, streamline component generation, improve refactoring, automate documentation, optimize testing, and enhance code quality.
- **Design Systems & Component Libraries** — Designed and documented reusable component libraries using **React, Storybook, and Design Systems**, improving UI consistency, maintainability, and development efficiency across enterprise applications.
- **Performance, SEO & Accessibility** — Optimized enterprise applications using **SSR, SSG, ISR, Lazy Loading, Code Splitting**, and best practices for **Core Web Vitals, SEO, and WCAG 2.1** accessibility compliance, delivering faster and more accessible user experiences.
- **Enterprise Front-End Modernization** — Contributed to enterprise modernization initiatives by migrating legacy applications built with **ASP.NET MVC, HTML, CSS, JavaScript, and jQuery** to modern architectures based on **React, Next.js, TypeScript, and Angular**.
- **Modern Front-End Ecosystem** — Built enterprise applications using **React, Next.js, TypeScript, Angular, Redux Toolkit, Context API, React Hook Form, Storybook, Tailwind CSS, Material UI, Jest, React Testing Library, and Cypress**.

- **Enterprise Delivery & Agile** — Participated throughout the full **Software Development Life Cycle (SDLC)**, from requirements analysis to production deployment, collaborating with **UX/UI, Backend, QA, DevOps, and Product Owners** in **Agile (Scrum)** environments.
